Importance: High

Hi Team - I'm sending to the negotiating group only in the interest of time. OECA's Communications Director is asking for fast review of the web content he is creating related to PFCs. I think the content looks fine, but he and I also discussed linking to an existing website that currently discusses the 2005 TSCA and RCRA case against DuPont. John plans to create a new heading on that page for the SDWA case information that would include the 2002, 2006, and 2009 Orders. I

Ex. 5 AC/AWP

John would also like to include the associated fact sheets with the orders on that web page. I asked Roger if he has copies of any fact sheet that accompanied the 2002 order, as I do not, but I have attached the 2009 fact sheet and what

Ex. 5 AC/AWP

Ex. 5 AC/AWP

Can you please take a look at the fact sheets and let me know if you have any concern about including them on a webpage for the orders?

My conversation with John also got me thinking that we need to consider developing a fact sheet for the anticipated 2016 order. I believe the Regional OPA's took the lead on developing the fact sheets in the past with case team review. Does that sound right, Roger? If so, I want to reach out to our OPA offices to put this on their radar. My SC also suggested what may be very helpful is when we post the 2016 order we also include the AR as an attachment with live links to each item in the AR. I think this is worth considering and may help forestall future FOIA requests.

Jacqueline Clark

Jacqui, Mike and Jeff-as you'll see, the DuPont section on the draft web page has a broken link for the 2006 and 2009 settlement info. I think that page may have been taken down because it contained duplicate info, but we now no longer have those documents posted to my knowledge-Leslie was able to get copies of the 2009 order and a fact sheet, but I'm not sure we have a copy of the 2006 settlement.

Do you think it works if we post the attached fact sheet and order to this page for the DuPont cases (along with the 2006 order if we have it), but adding some language to reflect the updates at the sites?

Thanks,
John

Importance: High

All,

The Office of Web Communications here at HQ is updating all PFAS web content over the next few days and is asking for OECA and the relevant regions to review the language related to the PFAS "enforcing environmental laws" section of [this draft web page](#), which is currently only posted internally, but will be made public later in the week. (To access this page, you will first likely need to go to <https://wcms.epa.gov/user> and enter your LAN ID and password and then refresh the initial link.)

As you'll see, the case list comprises two drinking water cases at Air Force bases (in Regions 1 and 3) and the DuPont case. I'm not sure whether FFEO or the regions have more familiarity with the AFB cases, so I'm including contacts from both on this email (Dave Deegan and Mike D'Andrea are my counterparts in Rs 1 and 3; Rich Albores and Sally Dalzell are from the federal facilities program here at HQ). I know that Jacqui Clark in R5 has expertise on the DuPont case.

Please let me know ASAP if you see any major issues with this content (i.e. incomplete cases list, major factual inaccuracies, etc.) and Leslie Davies-Hilliard or I can communicate that to the web office. (We are already aware of one broken link in the DuPont section that needs to be fixed.)

Otherwise, please review the draft web page (text is also attached in a Word doc) and send me and Leslie any comments you have in tracked changes by COB tomorrow so we can provide a final set of edits to the web office Wednesday morning.

Please feel free to call me in the meantime if you have any questions or want to chat about any of this.

Thanks,
John
